**DETAILED ACTION*****Drawings***

The drawings are objected to because in Figure 1, the numeral “9” is missing its lead line. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Objections***

Claim 7 is objected to because of the following informalities: Claim 7 depends upon canceled Claim 5. Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3654

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohn (German Patent No. DE 195 05 277) in view of Yang (U.S. Patent No. 4,349,123).

With respect to Claims 8-9, Kohn, Figures 1-8, teaches a method of having a winding-up roller 10 a drive for the winding-up roller, a roll which is arranged on the winding-up roller and comprises at least one film web and stacks of bags arranged thereon; the web is guided over a deflecting roller. Yang, Figures 1-7, teaches the openings of the bags are arranged at the front, as seen in the unwinding direction. It would have been obvious to one of ordinary skill in the art to provide the openings at the front, as taught by Yang, for the purpose of making it easier on the user to find the opening of the bag.

#### ***Allowable Subject Matter***

Claims 1-3 and 6-7 are allowed.

Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

Applicant's arguments filed May 2, 2007 have been fully considered but they are not persuasive.

With respect to applicant's remark regarding the combination of references, it should be noted that the examiner recognizes that references cannot be arbitrarily combined and that there must be some reason why one skilled in the art would have been motivated to make the proposed

combination of primary and secondary references. However, there is no requirement that a motivation to make the modification be expressly articulated in the primary reference. The test for combining references is what the combination of disclosures taken as a whole would have suggested to one of ordinary skill in the art. References are evaluated by what they suggest to one versed in the art, rather than by their specific disclosures. In the instant case, the combination of references read on the claims as set forth.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
